

konstrux nesting tables...

Give you a multitude of options

The konstrux nesting tables are the perfect solution for meeting your training, conference, and workspace needs. They incorporate a streamlined flip-top design along with a fashionable frame structure that can easily be set-up or stored by using the single-handed, one-touch quick lock button. These tables nest together in a straight line for convenient storage in a reduced footprint and the nylon bumper protects the tops.

The konstrux nesting tables are available in three standard finishes that include Bio Bamboo, Designer White, and Fusion Maple. In addition, you can utilize the pivot point knob for storage of pocketbooks and small baggage without having to place them on the ground. There are also accessories available that will provide flexibility and let you customize the tables to meet a variety of needs. Those accessories include a clip-on modesty panel, under-hanging steel organizer tray for personal storage, ganging mechanism to keep the tables neatly in line, and an electrical plug and play system.

Easy to ship, assemble, or disassemble, this innovative table with lever-lock, heavy duty casters let you quickly transition or move the tables with ease. The optional clip-on modesty panels can easily be attached to every table.

The konstrux application plate (KAP) is a precision alloy die-casting application plate that is key to konstrux's sustainable component connectivity and allows for easy ganging as well as the addition of the screen systems should this be required.

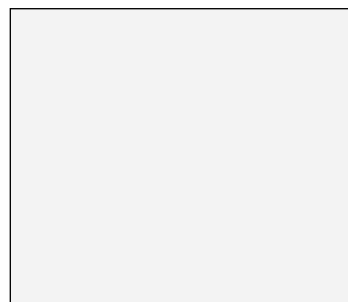

The konstrux nesting tables can easily accommodate the needs of the office, education, hospitality, and health care environments.
