

versatile spaces

konstrux is easy to install and rearrange to fit any of your office needs with a wide array of set ups. As the needs of the user change, so can konstrux; enabling the freedom to constantly adapt, without the financial burden that usually comes with those changes. konstrux provides a working environment where collaboration is fostered and expected.

growth while reducing floor space

Our working tables not only encourage your employees to interact and collaborate, but actually make it seamlessly so. The tables can be arranged in a variety of ways to maximize the use of your space. Expand the product by adding privacy screens and benching options. konstrux working tables are also available with rounded peninsulas for managers, vertical storage units, and so much more.

The KAP

The konstrux Applications Plate (known as the KAP) is a precision alloy die-casting applications plate that is key to konstrux's sustainable component connectivity.

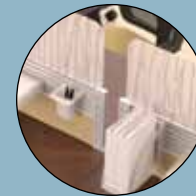

UNI-Connect

Steel connecting plate located in the KAP provides secure connection between tables or shared work surfaces.

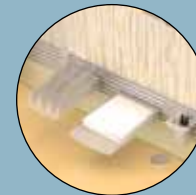

Power/Data

Plug and play power and data outlet box can be located on every konstrux work surface grommet, bringing power and data outlets within easy reach of the user.

Panel/Screen

Privacy screens and systemized screens attach to the KAP. Screens can wrap around, attaching on three sides of a table.

Accessories

A multitude of hang-on accessories can attach to konstrux's slat wall. Standard konstrux letter tray and penholder shown.

Personal Storage

Removable freestanding storage is available with a wide array of options from cabinets to shelves.

konstrux working tables expand your creativity;
expand the way you work;
and expand what's possible.

worx

Configure konstrux working tables any way you want. The working tables are versatile enough to fit into any environment whether the space has constraints or you want to group people together based on certain criteria. konstrux working tables enable you to set up these desks wherever and however you choose.

productive

Fundamentally basic tables, konstrux allows the user to customize their workstation with various accessories. Plug and play power and data outlets, a slat wall with add on accessories such as paper racks and pen holders, optional flexible and mobile personal storage compartments, systemized panels and privacy screens are just a few of the many ways to enhance and individualize the work stations.

The vertical space utilization of the slat wall allows the user to save space and therefore have a smaller footprint and use less of their desktop. The visual privacy panels (various options offered) create a barrier between those around the desk, while allowing the user to collaborate with those in their area if necessary. Slim and elegant lighting is available to provide a more individualized space. All of these accessories can be relocated to meet changing needs.
